

Task Number	Planned Action	Planned Outcome	Timed estimated (mins)	Target completion date	Criterion
1	Locate a client	Client identified with their issue including a possible solution	5	04/10/24	A
2	Meet with supervisor to discuss potential products	Supervisor approval of IA proposal	10	05/10/24	A
3	Plan my interview with my client	Date of meeting including relevant and specific questions	20	05/10/24	A
4	Conduct interview with my client	Clear depiction of the issue, reasons for such issues. Expectations for the program solution.	40	07/10/24	A
5	Transcribe responses	Save these answers for later use during the planning and creation process	15	07/10/24	A
6	Write solution to problem	A plausible solutions is identified and is able to be proposed to the client.	10	14/10/24	A

7	Write Success criteria	Success criteria are based on clients expectations as well as focusing on aspects such as functionality.	35	16/10/24	A
8	Revise and finalize Criterion A		20	28/10/24	A
9	Create an initial structure diagram/flow chart	Prototype of the functionality of the program is created and is able to get feedback from client and supervisor.	60	30/02/25	B
10	Revise structure prototype with client	Utilise the feedback and implement it	10	03/03/25	B
11	Create table of records	Develop a structured plan for the project including all 5 criterion	30	04/03/25	B
12	Create a final structure chart	Create a detailed and logical structure chart.	120	07/03/25	B
13	Create UML use case Diagram and UML Class Diagram	Diagrams are finished	120	10/03/25	B
14	Create system	Diagrams are finished	100	14/03/25	B

	flowcharts				
15	Create Data structure diagrams	Diagrams showing how data will be stored and manipulated have been created.	120	16/03/25	B
16	Create Interface Diagram	Diagrams are finished	60	17/03/25	B
17	Test Plan Which includes actions that need to be tested and its methods	Test plan completed	45	20/03/25	B
18	Revise Criterion B		60	22/03/25	B
19	Compile list of resources such as assets and information	Organize and plan what i will use in the project	45	01/11/24	C
-----	GUIs				
20	Create a Main Menu	←	45	04/11/24	C
21	Create a Settings Menu	←	45	06/11/24	C
-----	Learn				
22	Create a Menu for different information	Create an area that holds and displays information and resources	100	10/11/24	C

-----	Test				
23	Create a menu for tests	Create an area for users to customise their learning	20	14/11/24	C
24	Create the structure of the tests(multiple choice etc)		80	17/11/24	C
25	Create the score or results tab		30	20/11/24	C
-----	Play				
26	Create map 1(test drive with focus on physics)	A environment that allows the user to solely focus on physics	60	25/11/24	C
27	Create Map 2 (city)	An environment that is narrow and realistic that allows realistic behaviors	100	28/11/24	C
28	Organize and structure Scene Manager		20	28/11/24	C
Code					
Minimap_cam			60	16/12/24	
29	Update()	Updates camera position to match car orientation			C
radio			120	23/12/24	
30	Start()	Starts playing the			C

		first track			
31	Update()	Updates UI, listens for input and handles auto track switching			C
32	Next_song()	Plays next song			C
33	Prev_song()	Plays previous song			C
Speedometer			100	08/01/26	
34	Start()	Initializes gear to N/0			C
35	Update()	Calculates current speed, updates gui			C
36	FixedUpdate()	Controls gear logic, braking/reversing logic			C
37	Gear_up()	Increments current gear number			C
38	Gear_down()	Decrements current gear number			C
wheel effects			100	15/02/26	
39	Start()	Disables all trail renders and particles			C
40	FixedUpdate()	Calls drift check every physics frame			C
41	Check_drift()	Checks whether the car is drifting or braking			C

42	StartEmitter() ()	Enables trail renders			C
43	StopEmitter() ()	Disables trail renders			C
Car controller			360	08/03/25	
44	Start()	Initializes car rigidbody and center of mass			C
45	Update()	Captures player input, pitch and yaw. Calculates tempo			C
46	FixedUpdate() ()	Applies forward/reverse force, braking, turning and drag			C
47	Is_Flying()	Checks whether car is grounded. Used in other scripts			C
48	GroundCheck() ()	Uses raycast to detect if car is grounded			C
49	List all techniques used in code(with examples)	Allows me to separate and focus on important techniques	25	01/04/25	C
50	Explained the use of techniques in the code	←	100	05/04/25	C
51	Review Criterion C	←	20	06/04/25	C
52	List down all properties in game	Cross check if success criteria is	15	09/04/25	D

		met			
53	Record game		30	13/04/25	D
54	Cross check work with success criteria		60	18/04/25	E
55	Create some reflective questions for the client to answer after reviewing product		20	20/04/25	E
56	Meet with client		45	22/04/25	E
57	Write recommendations for a future project		60	25/04/25	E
